# Key Areas for Article 6 Capacity-building: Overview

## Planning

Policies for decarbonization (NDC, LTS, etc.)

Work plans and specific timelines

Institutional arrangement, national authority/coordination

## Implementation

Rules, guidelines, tools, formats, etc.

Approval of projects

Authorization of ITMOs

Corresponding adjustments

## Monitoring/Evaluation

Domestic registry, International registry, A6 database, CARP

A6 technical expert review

Reporting (initial report, annual report & regular info (as part of BTR1 ))

- 1. Importance of understanding the Article 6 rules and its relations to NDCs:** *There is a need to have a clearer understanding of the agreement to implement it.*
- 2. Need to prepare institutional arrangement for Participating in Article 6:** *National coordination and institutional arrangement are required to carry out authorization and corresponding adjustments.*
- 3. Utilizing Article 6.4 mechanism:** *The expectations on the 6.4 mechanism as a tool to enhance ambition.*
- 4. Reporting of Article 6:** *There is a need to discuss what is needed for Article 6 reporting, including in relation to data collection and corresponding adjustment.*
- 5. CORSIA and voluntary carbon markets:** *We can learn from the experiences of CORSIA.*

- **Coordination of efforts** (RCCs, Parties, International Organizations, Private Sector, etc.) is much needed
- **Sharing countries' experience** on Institutional arrangement for authorization and corresponding adjustments will facilitate implementation
- Support for **pilot project and domestic tracking and recording infrastructure** including registry
- **A6 mechanism baselines and tools:** experience of CDM standardized baselines, hands-on support,
- **Scaling up of capacity-building activities:**  
A6 reporting training : replication through RCCs network for other regions
