*AEF 1 may come in more than one set, i.e. for year 2023 and any previous year, as relevant.

Additional reflections

Parties involved in a cooperative approach must establish criteria on which compliance with environmental integrity is nationally assessed?

National regulations and institutional arrangements must minimize impacts, and to demonstrate that the activities are aligned with the NDC and long-term objectives

Protocols or manuals must be created for activities developers to help them to comply with the main principles
